

Imagine an old-fashioned doctor's office as comfortable as your own home.  
Imagine cutting edge health care served with elegance and quiet humility.  
Imagine a safe place with no lines or waiting...  
...a place where the doctor is waiting for you!

### **A home-grown doctor**

Having lived in the same Park Cities/Preston Hollow zip code continuously for the past 40+ years, Dr. Peikari understands what you want in a local doctor. You have worked hard to get where you are; now let Dr. Peikari work to help you enjoy it.

### **The exclusive benefits of access**

- Direct access to your personal physician via phone and/or email
- Your typical office wait time is less than 5 minutes
- Same day appointments
- Unhurried visits
- World-class specialist referral network
- Clients who are out of town can call or email their physician directly for prescriptions
- Medical concierge available to coordinate your care seamlessly
- House calls available (to limited zip codes)
- Weekend appointments available
- Direct physician contact with specialists
- Lovely, tree-shaded grounds with security and easy parking

### **Practice Areas**

Dr. Peikari not only handles your primary care needs, but he also helps you achieve your dreams. With a scholarly pedigree from SMU, Southwestern Medical School, and Presbyterian Hospital's Department of Internal Medicine, Dr. Peikari's advice is sought by physicians and discerning patients alike. In his previous role as Chief of Medicine at Baylor Hospital in Garland, Dr. Peikari wrote the textbook used by many other physicians nationwide to study for their specialty Board exams. His current areas of special interest include:

- Hormone balancing for men and women
- Weight management, diet planning and nutritional supplements
- Optimizing memory, concentration, focus and productivity
- Improving stress, depression and sleep
- Cardiac health and high performance athletics
- Customized thyroid replacement therapy
- Executive physicals and "full body" vascular scans
- Aesthetics, including advanced use of Botox and fillers
